

# 10 reasons Enterprise helps you Do Better Business

1

## Cloud First

By being Cloud first Enterprise makes deployment, support and new releases quick and pain free. Access it through your browser or one of our 6 mobile apps

2

## Easy to Use

With a simple to use interface and a logical approach to business management, Enterprise takes the complexity around running your business. Get up and running in days not months.

3

## All-in-One

With a simple to use interface and a logical approach to business management, Enterprise takes the complexity around running your business. Get up and running in days not months.

4

## Land & Expand

You don't need to take on a big complex project to get up and running. Enterprise is designed to land, resolving your current challenges, and Expand to continually give you value with improved processes.

5

## Full-Service Partnership

At Enterprise we are not just your software provider but also your implementation, support and customer success partner.

6

## Over 20 years experience

We have been working with SME's for more than 20 years providing Business Management solutions to companies just like yours.

7

## Constantly Innovating

Every month we release an update to Enterprise with new features and enhancements designed to help you Do Business Better. Mostly based on customer feedback because we are always.

8

## Seamless Integrations

Square, Stripe and Shopify are just some examples of our unique integrations that expand what you can do by connecting to other solutions.

9

## Wyze Apps

Wyze Apps are our way of building custom solutions specific to your companies needs. Some companies need a little something unique and 'out of the box' isn't always enough.

10

## Personal Relationship

We make it our business to know your business and work with you every step of the way.
