

No More Data Silos – Fusion Meets Power BI, Instantly

Orbit's Fusion for Power BI enables businesses to connect Oracle Fusion Cloud Applications data with Microsoft Power BI effortlessly.

Bridging the Gap Between Data and Decisions

Integrating Oracle Fusion Cloud Applications with Power BI often presents challenges such as complex data extraction processes, lack of real-time data synchronization, and the need for custom connectors. These obstacles can lead to delayed reporting, increased IT dependency, and potential data inaccuracies.

Orbit's Fusion for Power BI addresses these issues by providing a seamless integration solution that allows users to access and analyse **Oracle Fusion data directly within Power BI**. This integration ensures real-time data synchronization, reduces the need for manual data handling, and empowers users to create **interactive dashboards and reports** without extensive technical expertise.

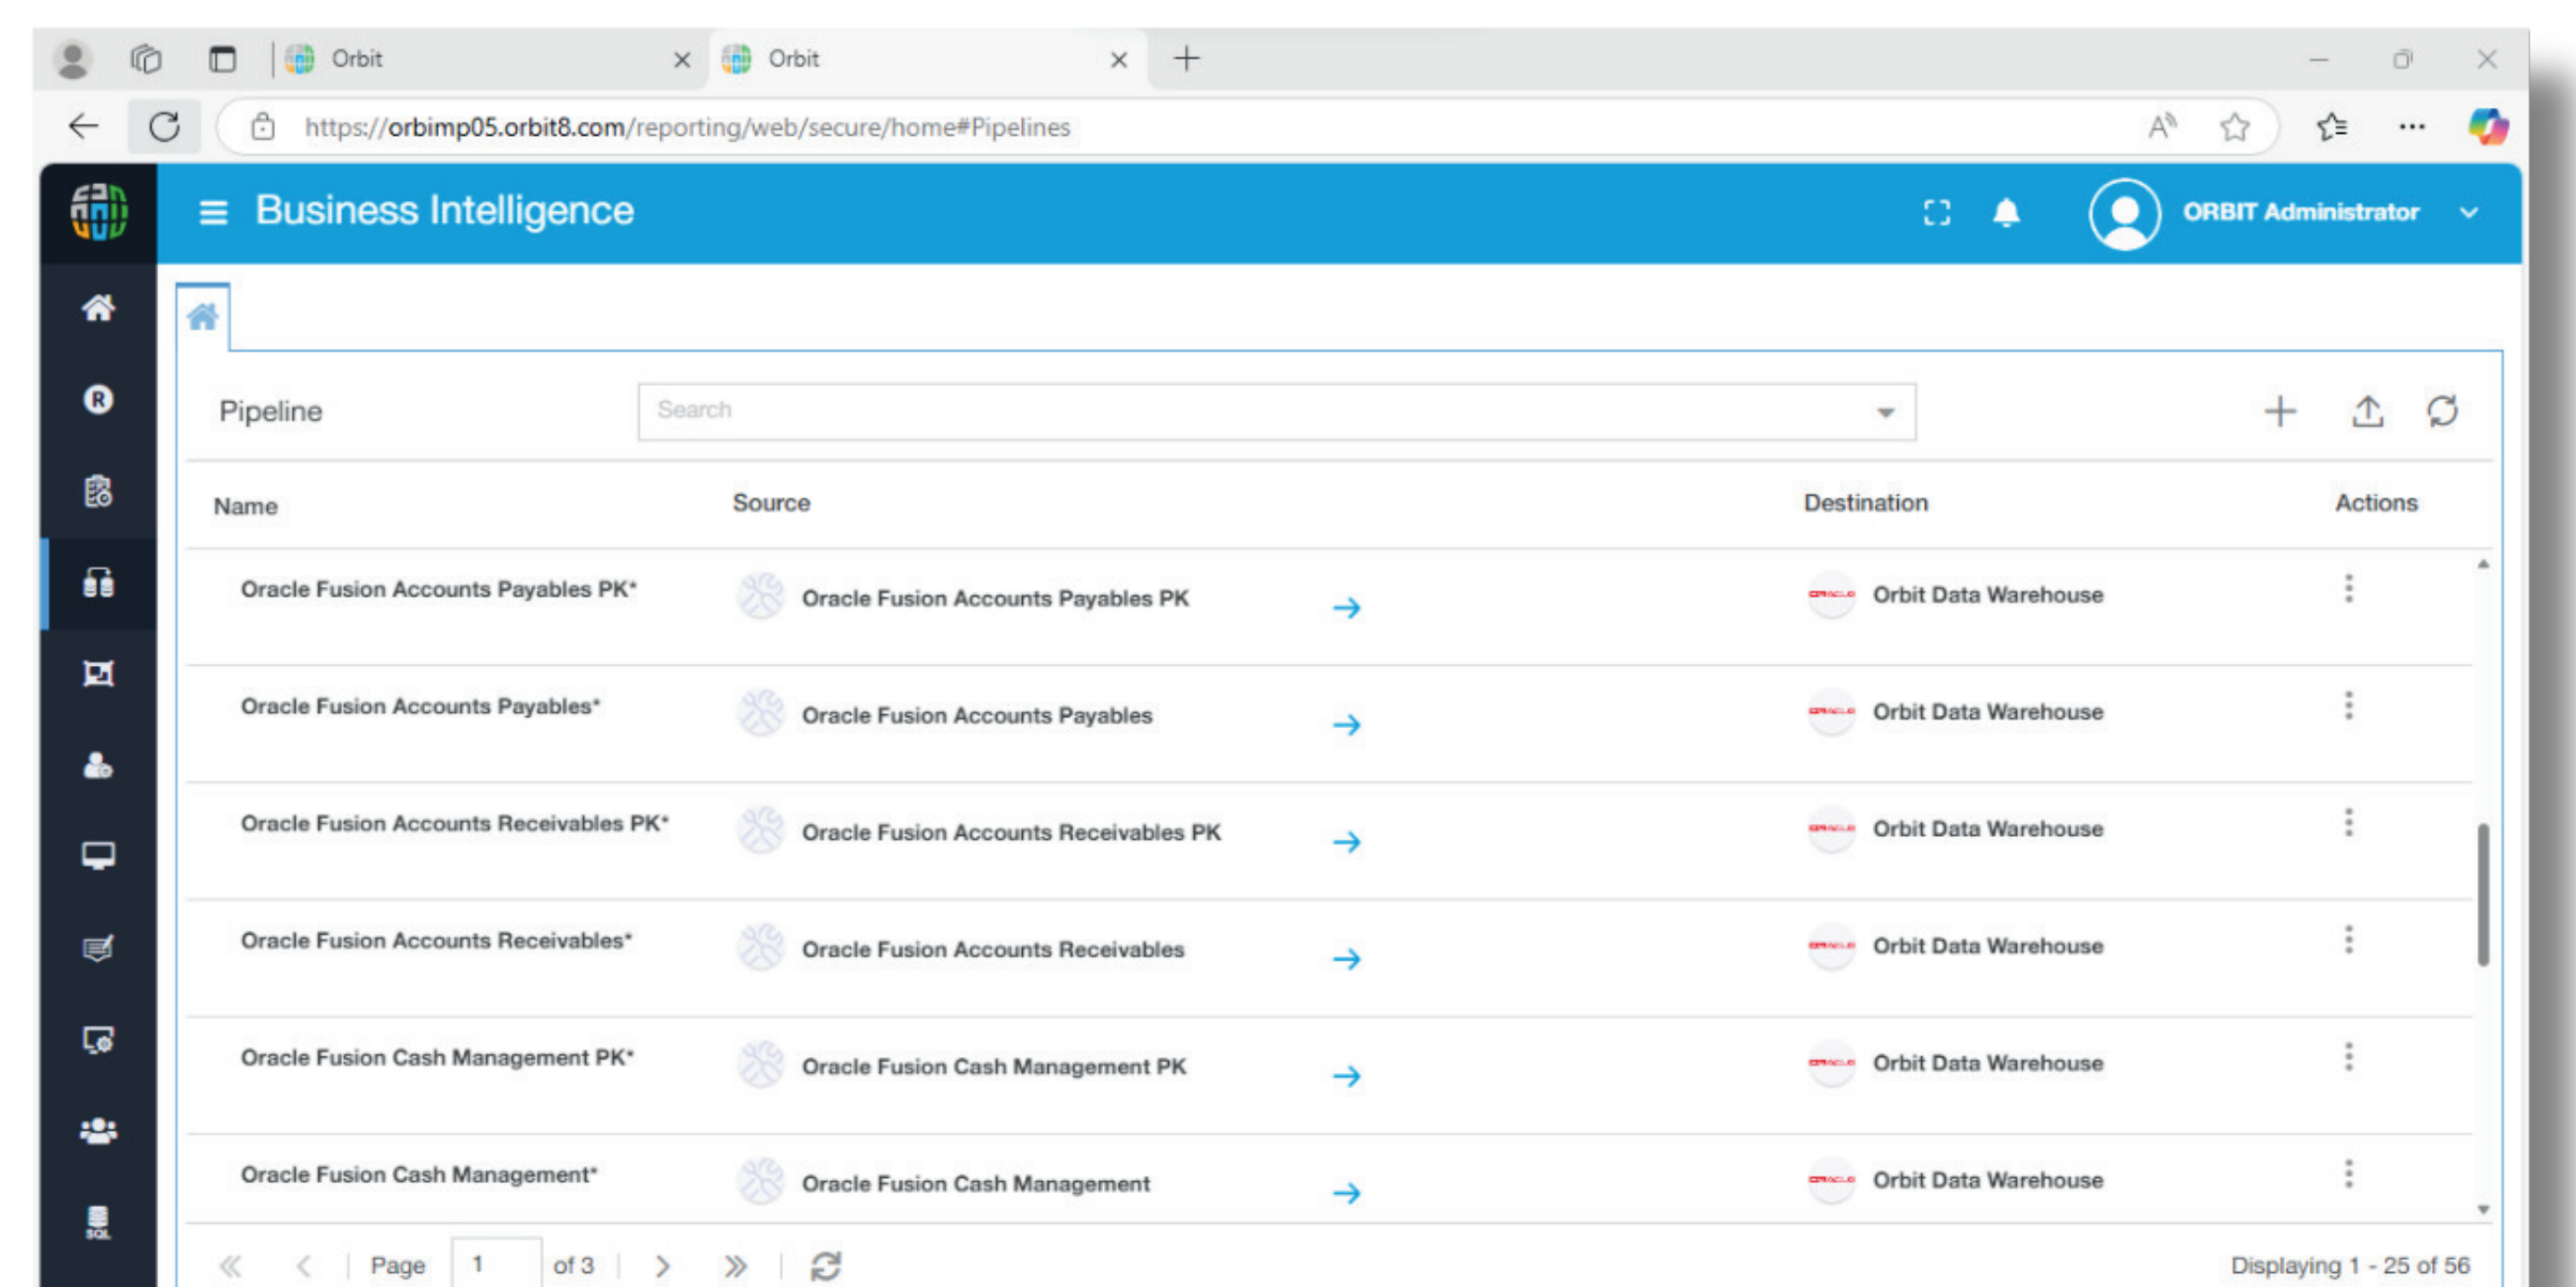

Fusion for Power BI

Streamline Your Analytics with Fusion for Power BI

- **Seamless Integration:** Connect Oracle Fusion Cloud Applications data directly to Power BI without needing third-party connectors or custom development.
- **Real-Time Data Access:** Ensure your Power BI reports and dashboards reflect the most current data from Oracle Fusion, facilitating timely decision-making.
- **User-Friendly Interface:** Empower business users to create and customize reports in Power BI without relying heavily on IT support.
- **Enhanced Data Accuracy:** Maintain data integrity and consistency across platforms, reducing errors associated with manual data transfers.
