

Opkey's Oracle Redwood Accelerator: Your Complete Migration Solution

The migration from Oracle Fusion's Responsive UI (or Classic) to the new Redwood interface represents a significant shift in how organizations interact with their HCM and SCM systems. While this transition promises enhanced user experience and modern functionality, it also presents substantial challenges for organizations in terms of implementation, testing, and user adoption.

Introducing, Opkey's Oracle Redwood Accelerator

Opkey's AI-powered Redwood Migration Accelerator is a comprehensive, purpose-built solution to streamline the transition from Oracle's Responsive UI to Redwood, ensuring a smooth migration while minimizing business disruption and maximizing ROI. From assessment, migration planning, and comprehensive testing framework, to end-user training that ensures high adoption, Opkey eases your transition while protecting the business from performance risks, cost overruns and business disruption.

Comprehensive Implementation Assessment

Opkey performs a deep analysis of your current Oracle Fusion implementation. We conduct a detailed inventory of personalizations and configurations, then provide an impact assessment of how the Redwood UI will affect your business processes, clearly delineating changes. We also help you clearly identify any potential risks in your migration strategy.

The Opkey Advantage

Reduced Migration Time

Cut your migration timeline by up to **50%** through automated assessment and planning

Cost Optimization

Save significant resources with automated testing and reduced manual effort

Risk Mitigation

Comprehensive testing coverage ensures smooth transition with minimal business disruption

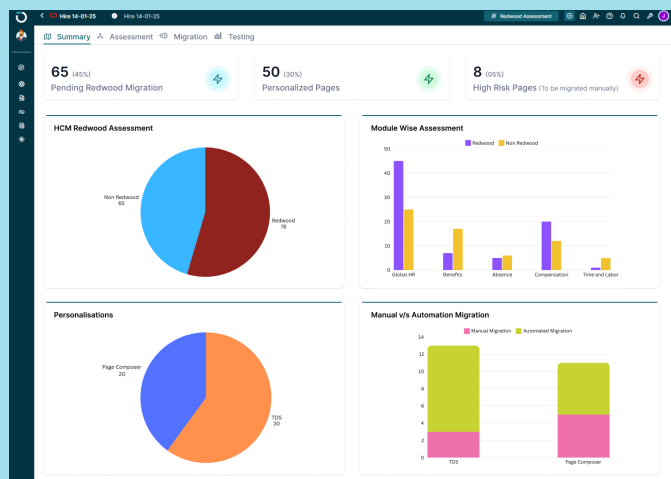

Enhanced User Adoption

Structured training approach ensures quick user adaptation to the new interface

Future-Ready

Maintain test assets for ongoing Oracle updates and changes

View your Redwood Readiness assessment to see summary data including the number of pages on different UIs, personalizations, page complexity, and more.

Intelligent Migration Planning

To streamline your entire migration process, Opkey automatically generates a detailed migration roadmap. Our risk-based testing strategy enables you to proactively identify and address potential issues. Resource optimization recommendations as well as timeline and milestone planning help you set realistic goals and track progress. Plus, we formulate a robust change management strategy to minimize disruptions during the migration process.

Automated Testing Framework

Opkey provides end-to-end testing coverage for critical business processes and automatically generates test cases for Redwood UI components. Regression testing

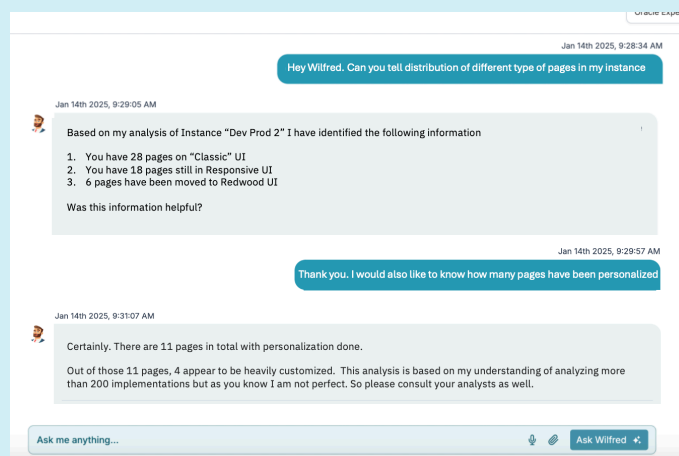

ensures that all functionality is preserved across the UI migration. We conduct performance and compatibility testing across browsers and devices. You'll also have real-time visibility into testing progress with comprehensive monitoring and reporting.

User Adoption Excellence

Opkey's multifaceted approach to user adoption starts with providing comprehensive user guides, designed to ensure a smooth transition for all users. Tailored, role-based training materials and interactive training simulations allow users to familiarize themselves with the new Redwood UI, while detailed change impact documentation serves as an invaluable resource to help them understand and adapt to new features and workflows.

Get Started Today

Don't let the Redwood UI migration challenge slow down your business. Contact us to learn how Opkey can ensure a smooth, efficient, lower risk transition.
