

Seamless Data Movement from Oracle Fusion—Fast, Flexible & Future-Ready

Orbit's Data Pipeline solution empowers enterprises to extract, transform, and load Oracle Fusion Cloud data with precision and speed.

Simplifying Enterprise Data Workflows for Unified Insights

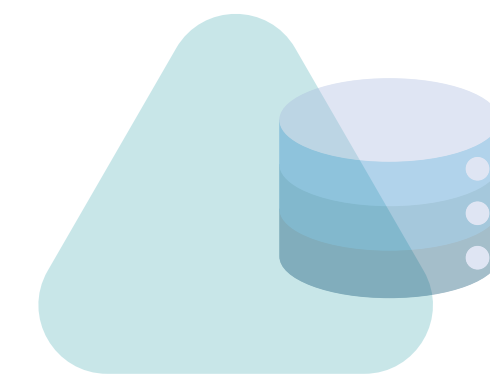

Accessing, transforming, and syncing data across Oracle Fusion Cloud Applications often involves **complex coding, manual workflows, and fragmented integration tools**. These barriers limit real-time insights, slow down reporting, and burden IT teams.

Orbit Data Pipeline removes these inefficiencies by offering an **end-to-end solution for extracting, transforming, and loading (ETL/ELT) Oracle Fusion data** into your preferred data warehouse. Whether it's ERP, HCM, SCM, or EPM – Orbit brings all your data together for **cross-functional analytics, real-time access, and automated workflows** with minimal coding.

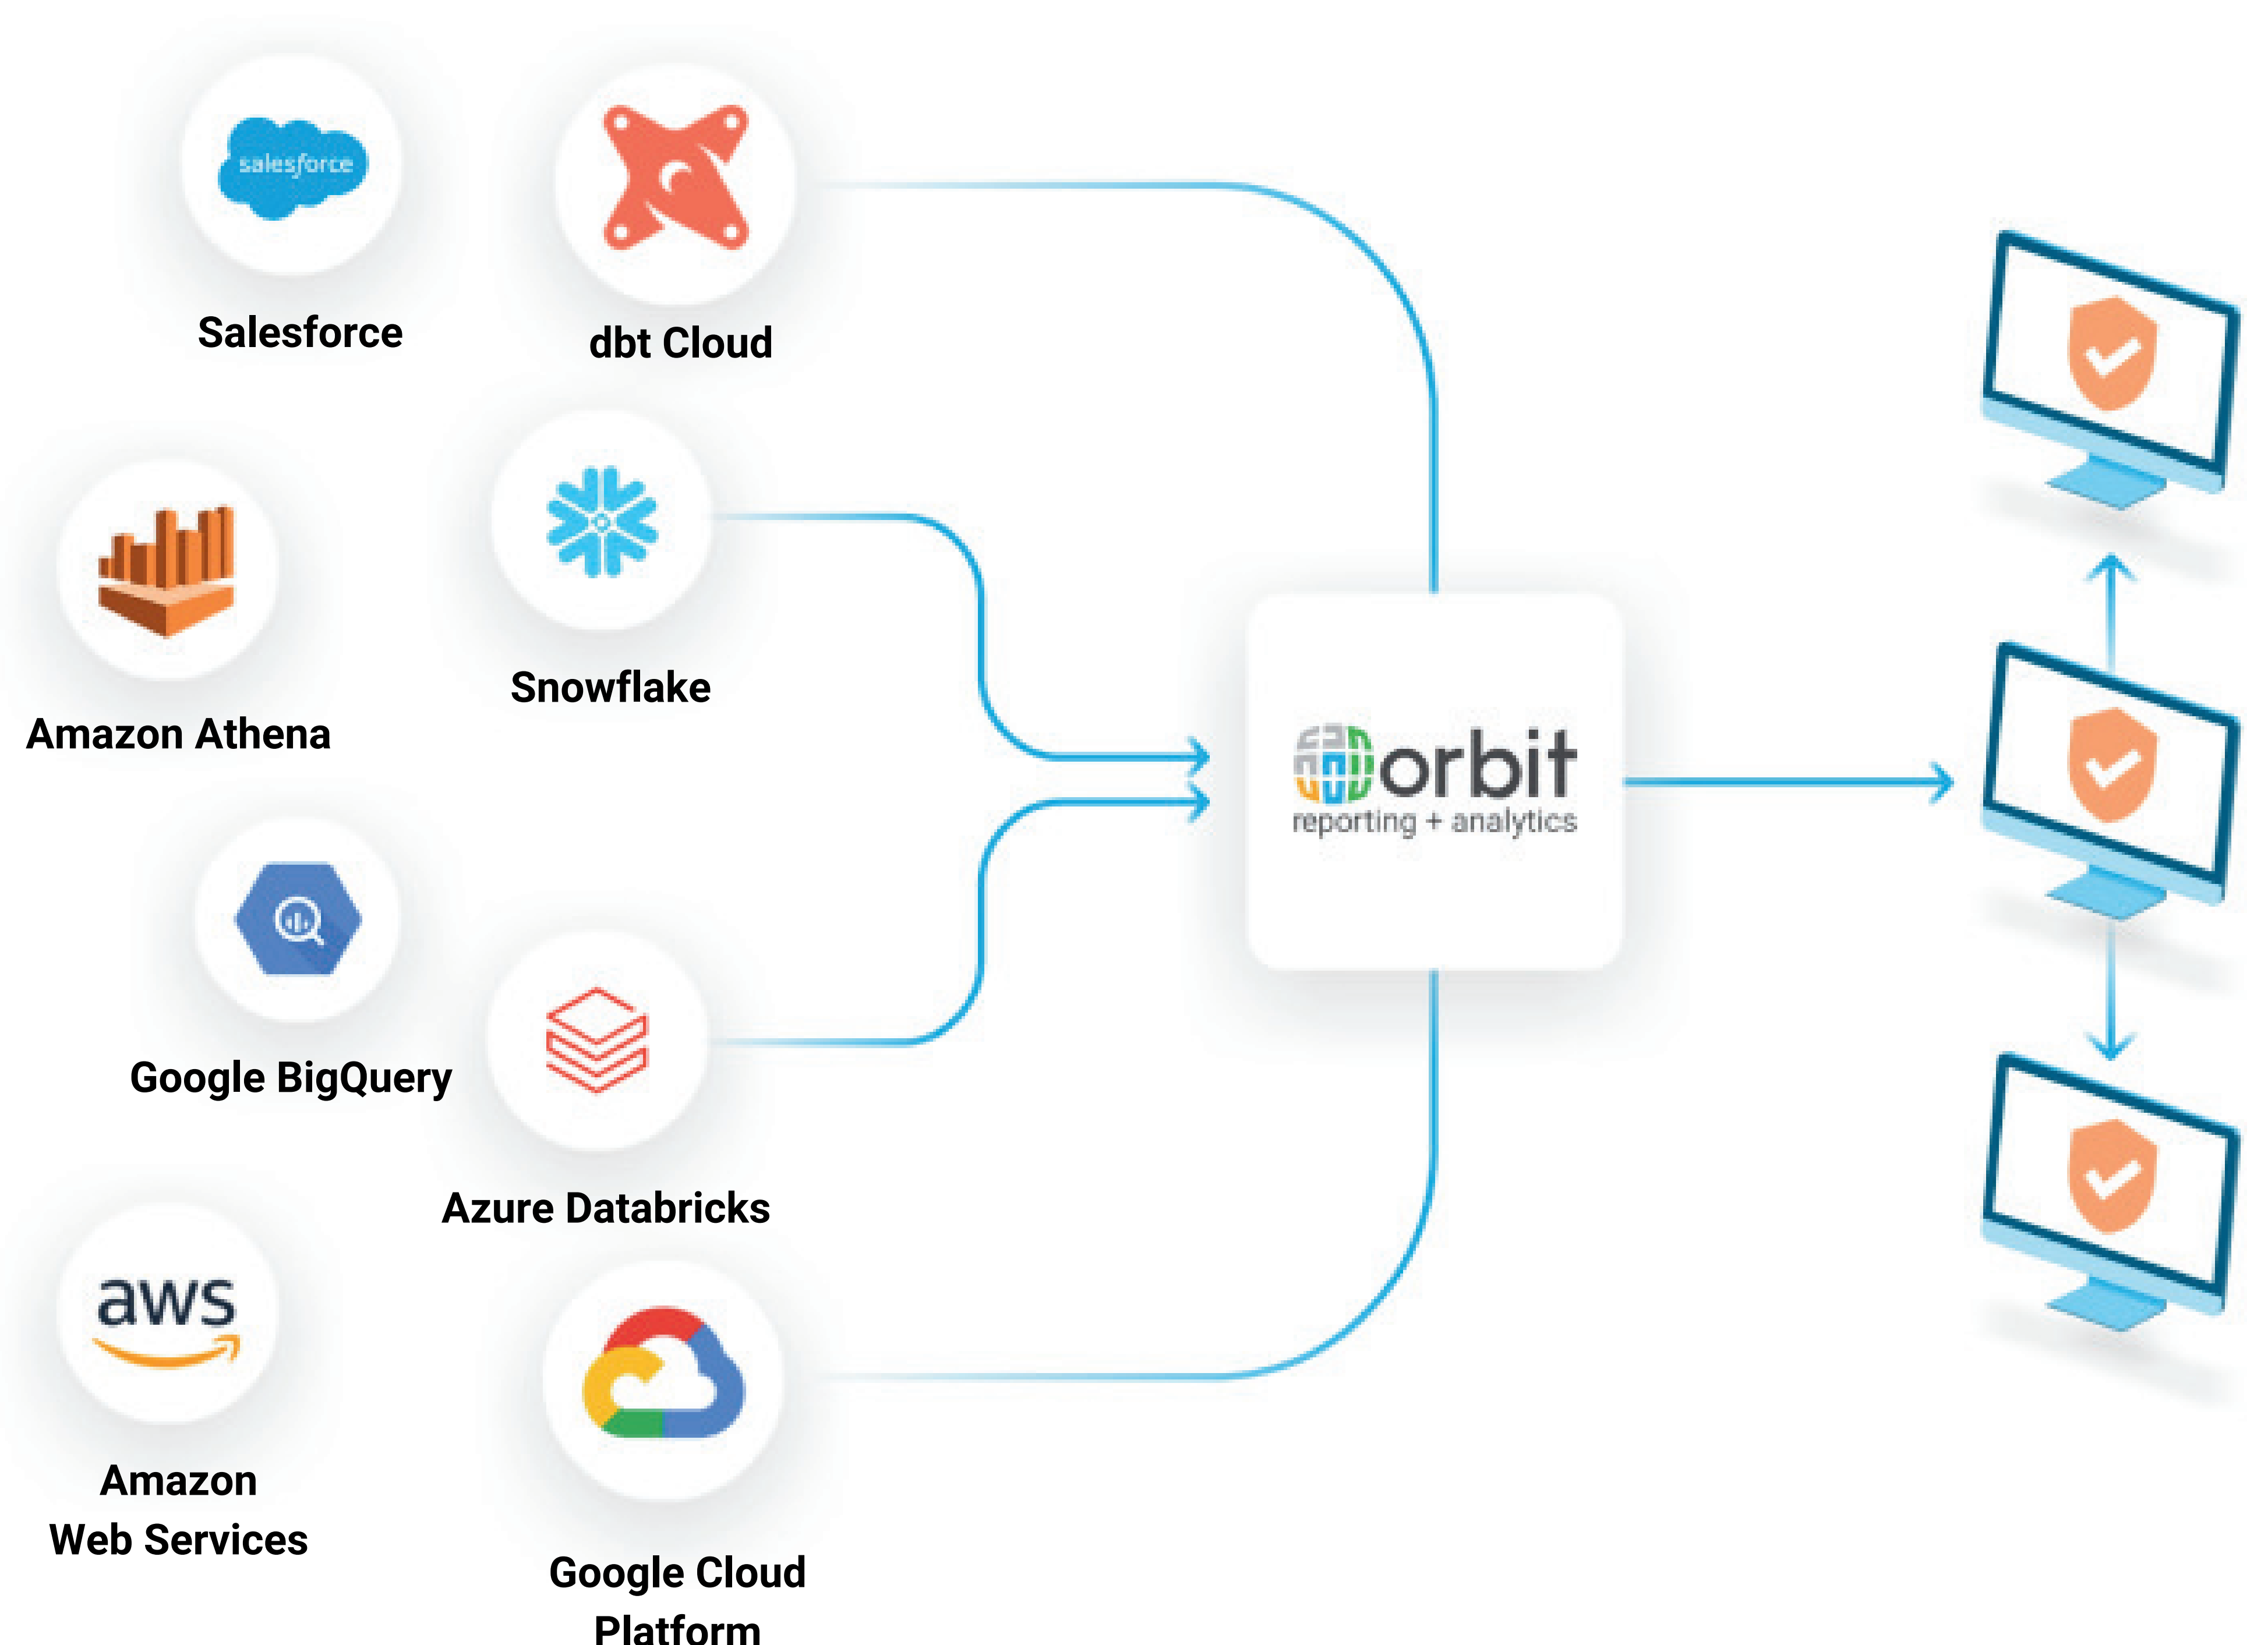

Orbit Data Pipelines

Smarter, Faster, and Unified Data Integration Starts Here

Enterprise-Ready ETL for Oracle Fusion Cloud Applications

- **Unified Data Integration** – Connects seamlessly across Fusion Cloud modules (ERP, HCM, SCM, EPM, EDM), enabling consolidated reporting across departments.
- **Automated Extraction & Scheduling** – Schedule real-time or batch data jobs with built-in automation for always-up-to-date analytics.
- **Flexible Load Options** – Choose full or incremental data loads for optimized performance and scalability.
- **Pre-Built Models & Dashboards** – Accelerate insights with customizable, ready-to-use templates and visualizations.

With Orbit Analytics: Automate Your Data Pipeline – Connect, Load, and Report Without the Hassle

How Orbit Reporting + Analytics can equip you to deliver greater business value with data.
